Lt Veach and Sgt Stout,

We are participating in a project with a company called Waymo. They are a driverless car company and want to record / map our emergency vehicles so the driverless car knows when to yield to emergency vehicles.

We have set a date for June 28th from 1715 to 2115 hours. Location Armstrong Way and McQueen RD to the west (in front of the city yard)

They need to record our Motor vehicles:

Honda MC

BMW MC
DUI Tahoe (whichever one)
DUI Ford (whichever one)

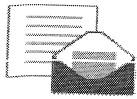

The hours are so they can record during daylight, dusk and night time conditions.

Can you have a these vehicles present on this date and time along with drivers? They will drive the vehicles code several times during the mentioned lightning situations

Thanks

Dana,

I am Lieutenant Dave Ramer and work for Commander Cox.

He asked for me to help organize for this project and I wanted to reach out to you to see if your side is ready to set a date for collecting the requested data.

If you could let me know and I will begin coordinating with the various groups.

thanks,

Hello all-

We are participating in a project with a company called Waymo. They are a driverless car company and **w**ant to record / map our emergency vehicles so the driverless car knows when to yield to emergency **v**ehicles.

We have set a date for **Wednesday, June 28th from 1715 to 2115 hours**. Location Armstrong Way and **McQueen RD** to the west (in front of the city yard). The hours are so they can record during daylight, dusk **and** night time conditions.

I need your help in finding 4 CIB vehicles of different color with lights and siren. At least 2 trucks and 2 **s**edans.

The detectives can leave their keys on Joe Pelegrin's desk. We will return them the following day.

Please let me know whose vehicles we can use for tomorrow evening. Thank you!!

Subject: Waymo Emergency Vehicle Test

Lt. Ramer,

Lauren Barriere, Waymo's Communications Manager, contacted me yesterday to coordinate the media briefing details for this event on June 28. I know you have been working with Waymo to coordinate the City's involvement in the testing, so I wanted to follow up with you regarding a few questions and requests Lauren made.

Waymo has asked to use an indoor facility for a media briefing, one-on-one media interviews, restrooms and catering service. Given the size of the group that may attend the event, our best options may be the break room in the Streets Building or the classroom space in the Municipal Utilities Wastewater Building. The testing location along Armstrong Way, facility access and the event ingress and egress for media are some of the factors to consider.

Waymo is inviting numerous local media outlets to the test and is seeking coverage from CNN and the Washington Post newspaper about the test taking place. Mayor Tibshraeny will attend the event and speak at the media briefing. Waymo also has asked that a representative from both Chandler Police and Chandler Fire, Health & Medical be available for media interviews that evening.

Waymo said that their local public relations firm and event staff will want to visit the City Yard to look at the indoor space and make a determination about which options would work best for them.

Lt. Ramer,

Changing the date will not be a problem. Let us know when you have confirmation.

Thanks,
Kevin

The 28th should work. I assume they only want one vehicle there at a time. I can't have them all there at the same time, we would need to rotate them through. Is the 1715 hour start time for Fire or everyone? I don't know how specific they need to be about vehicle types since most of ours have small differences.

Basic vehicle types that operate code 3 include

Engines
Ladder Trucks
Battalion vehicles
Rescues (ambos)
Brush truck- occasional code 3
TRT- occasional code 3

The speciality vehicles do not operate code 3 on response (so I assume they don't need these)- these vehicles respond without lights and siren

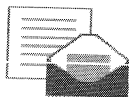

Haz Mat
Water tender
Utility/Scene support

Lt. Ramer has been assigned as the Project Manager for this Waymo mapping and recording event.

This event is scheduled to occur on Tues, 6/27/17 and utilize Armstrong Way. We would start this project at 1715 hours to accommodate the need to capture this information during daylight, sunset and nighttime hours.

Only FD and PD vehicles need to be recorded, we are in the process of identifying which PD vehicles need to be recorded.

Please contact Lt. Ramer or myself with any questions regarding this. Thank you.

Commander Cox,

Good morning. I only have one request, would you please consider waiting until 5:15 or so to shut down Armstrong Way to allow our personnel to exit our Street/Traffic facility, The personnel parking lot is only accessible via Armstrong Way. Other than that I see no issues and would be in favor of you moving forward with your request.

Please let me know if you need any additional information.

Have a great day.
Kevin

Kevin, Larry, John, Tom,

Waymo would like to utilize the Fleet Services property and Armstrong Way to map the street and record sound/video of emergency vehicles. The purpose of this project is to record the sound and video of our emergency vehicles, and that data will be loaded into the autonomous vehicles so they recognize emergency vehicles. Based on the number of different emergency vehicle platforms, which include different makes, emergency equipment, paint schemes, etc., it will take some time to accomplish this task. The City of Chandler is the first city in the nation to do this, and I would like to work with everyone to get it done safely, correctly, and efficiently.

With that being said, Waymo would like to map the area first, and then come back the first week of June to collect sound and video. The recording portion of the project will need to be completed in the daylight, sunset and nighttime hours.

This project will require us to shut down Armstrong Way. If I create a Project Manager from PD to work with our city departments to coordinate this project, would you all be on board with allowing Waymo access to the facility after hours? And, have your vehicles access Fleet Services through the south entrance off McQueen after 5:00pm? At this time, only FD and PD vehicles need to be recorded, and the amount of time we need to be there depends on how many vehicles we identify that need to be recorded.

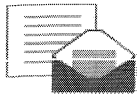

I just need feedback and approval from each of you to go ahead and proceed with the project. If there are any legal obstacles, of course, I would need some feedback on that too. I have been assured the recording of our vehicles, including some of our unmarked detective vehicles, will be kept classified. However, I am not included to have those vehicles recorded.

Thank you,
Bryan

Waymo has asked that a representative from Chandler Police and Chandler Fire, Health & Medical be available upon request for one-on-one on-site media interviews. The Mayor will address the media during the media briefing and will serve as the primary City spokesperson. However, we do anticipate reporters also will want to hear from Police and Fire representatives.

Attached are some draft talking points to review that provide a basic outline of key points that public safety representatives could address during media interviews.

Good afternoon Bryan,

Thanks again for your time on the phone last week to go over the logistics for this collection. I

wanted to check in and see if you needed any additional information from me or Chris on this? If so, please just ask.

Thanks so much,
Dana

Dana,

Thank you for the information regarding the mapping and sound collection of the emergency equipment. Once your personnel have scouted the location, please let me know if that will work and then we can coordinate a day and

time.

Kevin,

I am copying you on this email so you have some background as to what Waymo is trying to accomplish. They need to collect sound on our emergency vehicles, which will be integrated into the autonomous vehicles. The sound identification will allow the vehicle to recognize emergency vehicles so they can yield to them. Dana will be reaching out to you to arrange for the FD equipment to be mapped and recorded. The City of Chandler is the first municipality that Waymo has attempted to map and collect sound.

Regards,
Bryan

Subject: Data Collection

Good afternoon Commander,

I just left you a voicemail but thought I would follow via email as well.

I appreciate your patience in getting back to you as I wanted to make sure we had all the logistics set on our end. I am free all afternoon if you want to discuss in greater detail as it's probably easier to explain in a conversation, but I'll attempt to cover the immediate details below.

Before we schedule the mapping portion, since I'm unfamiliar with the site (and wasn't in direct conversations with Chandler PD folks), I wanted to verify that the location would be able to accommodate the collection of both sound and your vehicle movement from a long distance (300-400 yards). I was under the impression it could, but if not we might have to discuss a separate location.

Assuming it can, next week, either Wednesday or Thursday for the mapping works on our end, just give us a window that is easiest for you. For that portion, we just need access to the site for a few hours and not the vehicles. The vehicles would be needed when we actually do the data collection. As we discussed, I was hoping to arrange that the following week (May 16 or 17) but now it looks like pushing that to the first week of June (5-9) would work better. (I can walk through the logistics when we speak).

Thanks for all your coordination on this. Look forward to hearing back from you (via email or phone, whichever is easiest).

Many Thanks,
Dana

Dana Paschke

<Gale_Kevin.vcf>

Lauren Barriere, Waymo's Communications Manager, contacted me yesterday to coordinate the media briefing details for this event on June 28. I know you have been working with Waymo to coordinate the City's involvement in the testing, so I wanted to follow up with you regarding a few questions and requests Lauren made.

Waymo has asked to use an indoor facility for a media briefing, one-on-one media interviews, restrooms and catering service. Given the size of the group that may attend the event, our best options may be the break room in the Streets Building or the classroom space in the Municipal Utilities Wastewater Building. The testing location along Armstrong Way, facility access and the event ingress and egress for media are some of the factors to consider.

Waymo is inviting numerous local media outlets to the test and is seeking coverage from CNN and the Washington Post newspaper about the test taking place. Mayor Tibshraeny will attend the event and speak at the media briefing. Waymo also has asked that a representative from both Chandler Police and Chandler Fire, Health & Medical be available for media interviews that evening.

Waymo said that their local public relations firm and event staff will want to visit the City Yard to look at the indoor space and make a determination about which options would work best for them. This would be an opportunity to ensure the arrangements that you have already made can help guide that decision.

Give me a call on my office or mobile number to talk about the event.

Thanks,
Matt Burdick
